## eMagCreator Review:

eMagCreator gives you the benefit of having both online and offline editing features. In order for you to fully enjoy the features that are designed to work in this way, you need to get the online edition. For this, all you need to do is log into the web-based interface of the application that is available to you as a default, and that allows you to view all the elements that you manage. This feature works by creating new site pages that you are

---

able to see online and to manage them. This is a free version of the application that is compatible with all web browsers with Adobe Flash player. You also need to get the online version of the application in order to get access to all the functions of the offline edition that are available to the online version. To help you with the editing process, the program comes with a built-in designer, which allows you to create a template with which to start

---

with the work. Therefore, all of the web pages/videos you create are custom-designed according to your needs. As soon as you have finished your design, you can save it, and you can access it for editing at any time in the future. You can use a template that has been created by a previous client, or you can create your own from scratch. From the range of templates you are offered, you can select one that matches your needs and make further

---

adjustments to suit your needs. In case you need more information, you can always look up the help section that is included in the program. From there, you can view different sections of the program, manage the defaults, view examples, or even enable PDF preview of the templates that you have created for editing.
