While the price may be a little high for PC gamers who don't mind buying from a reseller, the release of a Sega Genesis Classic is long overdue. At least, its delayed and priced more affordable than some people might expect. We're not talking about your average retail prices of \$150. No, the Genesis Classic costs a mere \$119.99 in the USA, and it's set to hit other regions and retailers sooner than later. [...] It was back in 1996 when Sega released its Sega Mega Drive/Genesis console, making it an attractive gaming device in terms of hardware and software, especially with the release of the Sega Saturn and Nintendo 64. For the next two years, we saw a flood of Sega Genesis games released for the console, most of which were home releases. For the latest Japanese game releases and release dates, check out IGN Japan. Controlling membrane fusion and fission. Membrane fusion and fission are cellular events that are critical for the development and function of multicellular organisms. Indeed, in

humans, malfunction of these processes leads to neurodegenerative and age-related diseases. Controlling membrane fusion and fission is now feasible with the molecular techniques developed during the last 20 years. In this chapter, we summarize the recent progress in controlling membrane fusion and fission at the molecular level. We first discuss the approaches of using RNA, synthetic peptides, and antibody as membrane fusogens, which have proven to be promising tools for probing the mechanisms of membrane fusion. These fusogens provide a foundation for the construction of novel membrane fusion and fission systems. We also describe in more detail three recently developed methods for manipulating membrane fusion and fission, namely cell-free systems, designed in vitro RNA fusogens, and genetic screens for in vivo membrane fusogens.

```
'use
strict'; var benchmark = require('benchmark'); var suite = new benchmark.Suite(); var A = require('./a.js'); var B =
require('./b.js'); // ----- // Benchmarks var a = new A(); var b = new
B(); var array = []; suite .add('a.default', function () { var a = new A(); a.default(); 82157476af
